

WORK ZONES NEED YOUR UNDIVIDED ATTENTION

GIVE CONSTRUCTION WORKERS A BRAKE!

1 Lane closed: **1000 FEET** You know it takes longer for a truck to stop!

2 The number one cause of work zone crashes is following too closely.

3 See and be seen; Signal your intentions.

4 **LEFT LANE CLOSED AHEAD** Just because a lane is closed ahead, don't close out your career. **MERGE SMART.**

5 In 2008, there were 5,207 crashes in work zones; 15 fatal and 1,205 injury crashes in Ohio.

6 Remember, fines may be doubled in construction work zones.

7 Plan your route before you leave. For ongoing construction and traffic information, log onto www.buckeyetraffic.org

**SAFETY DOESN'T
STOP HERE!**
